## Floradale Seed Farms

**The Home of Burpee's Flower Seed Farms and Breeding Stations  
Ideally Located at Lompoc, Calif.**

*Where the Big Sweet Peas Grow*

Yes, and the big Zinnias, Petunias, Snapdragons, Asters, and all other flowers too. Here, under ideal conditions of soil and climate, Burpee produces the wonderful seeds that are famous as the best seeds that grow. Burpee's Floradale Farms comprise hundreds of acres in the fertile Lompoc Valley, about 40 miles north of Santa Barbara. The rich, deep soil, the moderate climate, and the heavy night dews all combine to give the seeds grown here exceptional vigor, vitality, and hardiness, which assure sturdy growth and successful blooming wherever they are grown.

Sweet Peas have always been one of the notable specialties at Floradale Farms. There are hundreds of acres of them and when they are in bloom they form one of the wonder-sights of America. Then, of course, there are all the other flowers for which Burpee is famous—and many vegetables as well which develop best in this climate. Like Fordhook, Floradale has also given its name to a large number of outstanding Burpee introductions. Its vast expanse of gorgeously colorful gardens has given Floradale a world-wide reputation as "The California Home of Flowers."

## Fordhook Seed Farms

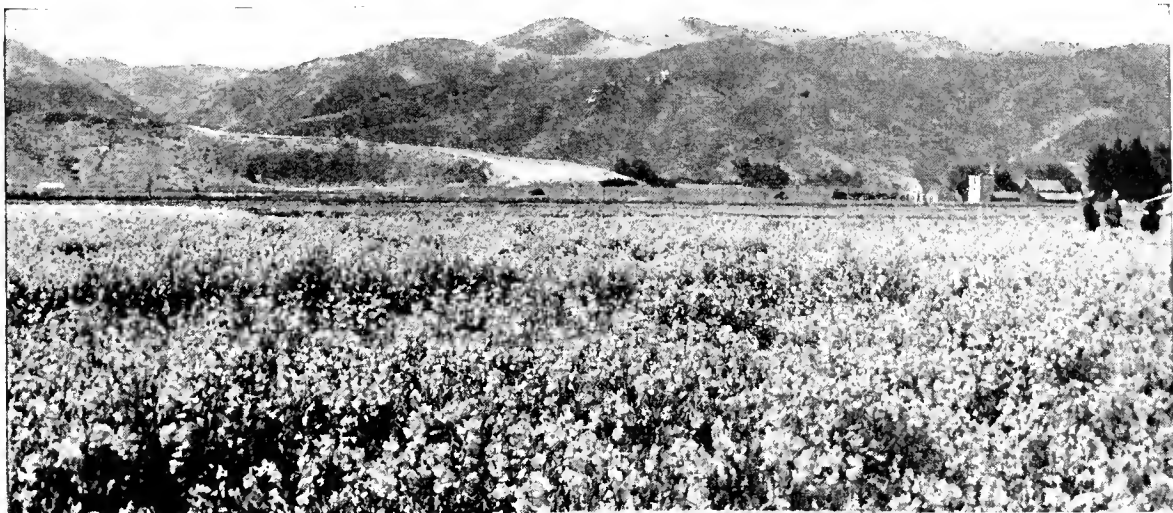

**and Experimental Gardens at Beautiful Doylestown, Pa.**

"Fordhook" long ago became a well-known and well-loved name among gardeners all over the world, for many of the famous Burpee introductions are named for the great Fordhook Farms. Extending around and right into beautiful Doylestown are the 800 acres of fertile farms and gardens which make up Fordhook. Here is produced the seed of many special strains of vegetables and flowers under the supervision of a large staff of experts.

Here also are the famous Fordhook proving grounds, the largest in the world, where all Burpee Seeds are thoroughly tested so that they may be backed by the Burpee guarantee. After a visit to Fordhook, Luther Burbank, the famous plant wizard, wrote: "Your Fordhook Trial Grounds were the best of all my eastern object lessons. I had no idea of their extent and value not only to yourself but to your customers, and eventually to everyone who cultivates the soil."

# BURPEE'S SWEET PEAS FOR FLORISTS

## EARLY OR WINTER FLOWERING—GIANT SPENCER

Burpee's Sweet Peas are world famous and are planted by most of the leading Sweet Pea specialists to the exclusion of all others, as our strain of Early or Winter Flowering Spencer Sweet Peas is recognized as the standard everywhere. They are valuable to florists for greenhouse culture and are also adaptable to outdoor planting in warmer climates, such as certain sections of our own southern states, Australia, and South Africa. In cooler climates they are of value for the garden because they bloom a week or ten days earlier.

The quality of the Sweet Pea blooms is most important to get the highest market prices. Most growers who sell to the markets realize this, and that is why the better growers all plant Burpee's.
